Professional Summary

Computer Engineering graduate with strong foundations in Python, SQL, Linux, Software Testing, and Web Development. Currently undergoing professional training at Cognizant in Cloud Operations and Enterprise Infrastructure. Passionate about Generative AI, NLP, Quality Assurance, and Automation. Hands-on experience building AI-driven and web-based applications using Python, React, JavaScript, and MySQL. Quick learner with strong analytical and problem-solving abilities.

Technical Skills

- **Programming Languages:** Python, Java
- **Databases:** SQL, MySQL
- **Web Technologies:** HTML, CSS, JavaScript, React, Bootstrap
- **Testing:** Manual Testing, Test Cases, Bug Reporting, API Testing (Postman)
- **Tools:** Git, GitHub, Linux, VMware, Postman
- **AI/ML:** NLP Fundamentals, Machine Learning Basics, Prompt Engineering, Generative AI Concepts
- **Core Subjects:** DBMS, Operating Systems, Computer Networks, Data Structures & Algorithms

Professional Experience

Cognizant Technology Solutions

Pune, India

Engineer Trainee

Jul 2025 – Present

- Undergoing professional training in Cloud Operations, Linux Administration, Networking, and Enterprise Infrastructure Management.
- Worked within Linux environments for user management, file systems structure, process monitoring, and core system administration tasks.
- Gained hands-on exposure to VMware virtualization topologies, virtual machine provisioning, and infrastructure deployment concepts.
- Utilized SQL for basic database queries, transactional data retrieval, and infrastructure troubleshooting activities.
- Applied networking fundamentals including TCP/IP, DNS, DHCP, VLANs, and OSI model architectures.
- Leveraged Git for systematic version control, source code repositories management, and collaborative technical assignments.
- Developed working knowledge of standard incident management, service monitoring, troubleshooting, and ITIL-based support processes.

Technologies: Linux, VMware, Git, SQL, Networking Fundamentals, Cloud Operations

Projects

MindMendor – AI Mental Health Assistant

GitHub Repository

- Developed an AI-powered conversational chatbot built end-to-end utilizing Python.
- Applied fundamental Natural Language Processing (NLP) workflows for structural intent recognition and mood analysis.
- Designed and integrated a highly responsive client-side interface using HTML, CSS, and vanilla JavaScript.
- Optimized conversational interaction loops to dramatically improve contextual flow and overall end-user experience.

Eternal India – Cultural Heritage Platform

GitHub Repository

- Architected a responsive web applications infrastructure mapping out Indian cultural ecosystems and tourism sectors.
- Programmed intuitive client-side search indexing and content filtering controls for dynamic asset discovery.

- Constructed the declarative UI architecture leveraging React components bundled with clean modern styling layers.

PetShop – E-Commerce Website

GitHub Repository

- Designed and launched a fully modular web store pipeline specialized for commercial pet utility listings.
- Maintained clean core transactional states including dynamic search grids, persistent cart updates, and mock workflows.
- Standardized viewport responsiveness across client devices using HTML, CSS architectures, and Bootstrap layouts.

Education

Savitribai Phule Pune University	Pune, India
Bachelor of Engineering in Computer Engineering	2025
CGPA: 7.33	

Government Polytechnic Kolhapur	Kolhapur, India
Diploma in Information Technology	2022
Percentage: 88.75%	

Certifications

- **Java Basics** – HackerRank Certification (2024)

Relevant Coursework

Database Management Systems, Operating Systems, Computer Networks, Software Testing, Machine Learning Fundamentals

Achievements

- Engineered and successfully delivered multiple web-based and machine learning integrated academic portfolios.
- Active Open Source contributor maintaining continuous deployment workflows across multiple public GitHub repositories.
